

# FLOOR PROTECTION BOARD

## Datasheet

Quality Covers Floor Protection Board is a very strong covering material, which can be used both indoors and outdoors. Floor Protection Board consists of new cardboard and first-class Scandinavian wood fibers.

### Material composition

New material board of 1st class Scandinavian wood fibers. Depending on the specification, it is LDPE coated on one or both sides.

### Specifications

Dimensions	Various weights and sizes available
Coating	Single or double sided coating
Packaging	On europallet
Color	White and/or Brown
Usability	Processing properties are not time dependent
Storage	Dry and protected from humidity

### Area of application

Quality Covers Floor Protection Board provides universal protection for indoor and outdoor floors. The use of Floor Protection Board prevents damage and contamination to the surface.

### Properties

- Very strong
- Heavy duty
- Liquid tight
- Removable and washable
- Reusable
- Consistent quality
- Environmentally friendly
- High puncture resistance

# FLOOR PROTECTION BOARD

## Datasheet

### Processing

- Make the substrate dry, clean and dust-free
- Switch off underfloor heating
- Lay the stucco carpet flat on the subfloor
- Overlap by 10cm and seal the material with a suitable tape
- Always test beforehand whether the product is suitable for the subfloor

### Notes

Quality Covers Floor Protection Board is not suitable for newly laid floors that still have to breathe or harden, in which case we recommend Quality Covers Breathable liner.

Floor Protection board is not resistant to aggressive substances, the surface must be permanently dry, clean, free of dust and solvents. If the Floor Protection Board is damaged (e.g. by reuse) it must be replaced.
